Lab 3: Blinky Exercise. The following program blinks an LED every second. Disassemble the instructions, list the length and cycles for each instruction, and then, compute the MCLK, CPI, and MIPS of the processor.

MCLK = _______ cycles / _______ interval / 1000000 = _______ Mhz
CPI = _______ cycles/ _______ instructions = _______ cpi
MIPS = MCLK / CPI / 1000000 = _______ MIPS
