

Please do the following before passing off with a TA

1. Load the following (purple) data into your server (preferably using your localhost website)

```
{
  "users":[
    {
      "userName":"sheila",
      "password":"parker",
      "email":"sheila@parker.com",
      "firstName":"Sheila",
      "lastName":"Parker",
      "gender":"f",
      "personID":"Sheila_Parker"
    },
    {
      "userName":"patrick",
      "password":"spencer",
      "email":"patrick@spencer.com",
      "firstName":"Patrick",
      "lastName":"Spencer",
      "gender":"m",
      "personID":"Patrick_Spencer"
    }
  ],
  "persons":[
    {
      "firstName":"Sheila",
      "lastName":"Parker",
      "gender":"f",
      "personID":"Sheila_Parker",

**2. Load up your app, and test everything you want to passoff. Make sure your app doesn't crash in this process.**

3. Please pass off in increments! If you only have parts done, that's okay! Get on the queue and pass those off. It helps both you see where you're at, and helps us with the queue length.
